

State of Montana

STATE FLOODPLAIN ENGINEER AND FLOODPLAIN MAPPING SECTION MANAGER

Helena, Montana | \$71,000-83,300 yearly based on qualifications

**NOW
RECRUITING!**

DUTIES

Montana DNRC's Floodplain Management Program is currently recruiting a Civil Engineering Specialist to manage the State's Floodplain Mapping Section and administer State adoption of floodplains and floodways. The State Floodplain Engineer is responsible for:

- ▶ **Program Management**
- ▶ **Personnel Management**
- ▶ **Floodplain Study Design/Adoption**
- ▶ **Community Technical Assistance, Outreach, and Training**

QUALIFICATIONS

Qualified candidates should possess the following:

- ▶ **Proven leadership, management, and problem-solving skills**
- ▶ **A strong background in floodplain hydrology, hydraulics, and mapping**
- ▶ **Experience managing complex programs and projects**
- ▶ **The ability to work on multidisciplinary teams with diverse skillsets**

BENEFITS

Great benefits associated with living in Helena and working for the State Floodplain Program include:

- ▶ **Generous time off**
 - ▶ 15 working days annual leave per year
 - ▶ 12 days sick leave per year
 - ▶ 10-11 paid holidays per year
- ▶ **Compensation time earned over 40 hours per week**
- ▶ **Public Employee's Retirement program**
- ▶ **State-paid premiums toward employee medical, dental, and basic life insurance coverage**
- ▶ **Excellent outdoor recreation opportunities, including access to Glacier, Yellowstone, and other state and national parks**
- ▶ **Casual dress, fun coworkers, and a relaxed office environment**
